

# Introduction

- What is it
- Inspired By HackerRank
  - °Tryhackme
  - °Hackersec
- We intend to create a platform for matching services and service providers, where the client can briefly describe the required security service, and the system will cross-reference the data to bring the best options to them.

# features

- **CHALLENGES**

Professionals can register and participate in challenges designed to test and improve their skills.

- **CERTIFICATIONS**

Professionals received a certificate according to their points.

- **RANK**

On the platform there will be a ranking of professionals with the highest points.

[Return to index](#)

# Differences

## **DIRECT CONNECTION**

The platform facilitates direct connection between cybersecurity professionals and companies, eliminating intermediaries and streamlining the recruitment process.

## **FOCUS ON CYBERSECURITY**

the platform will meet a growing and critical demand in the market, offering specific and targeted solutions for this area.

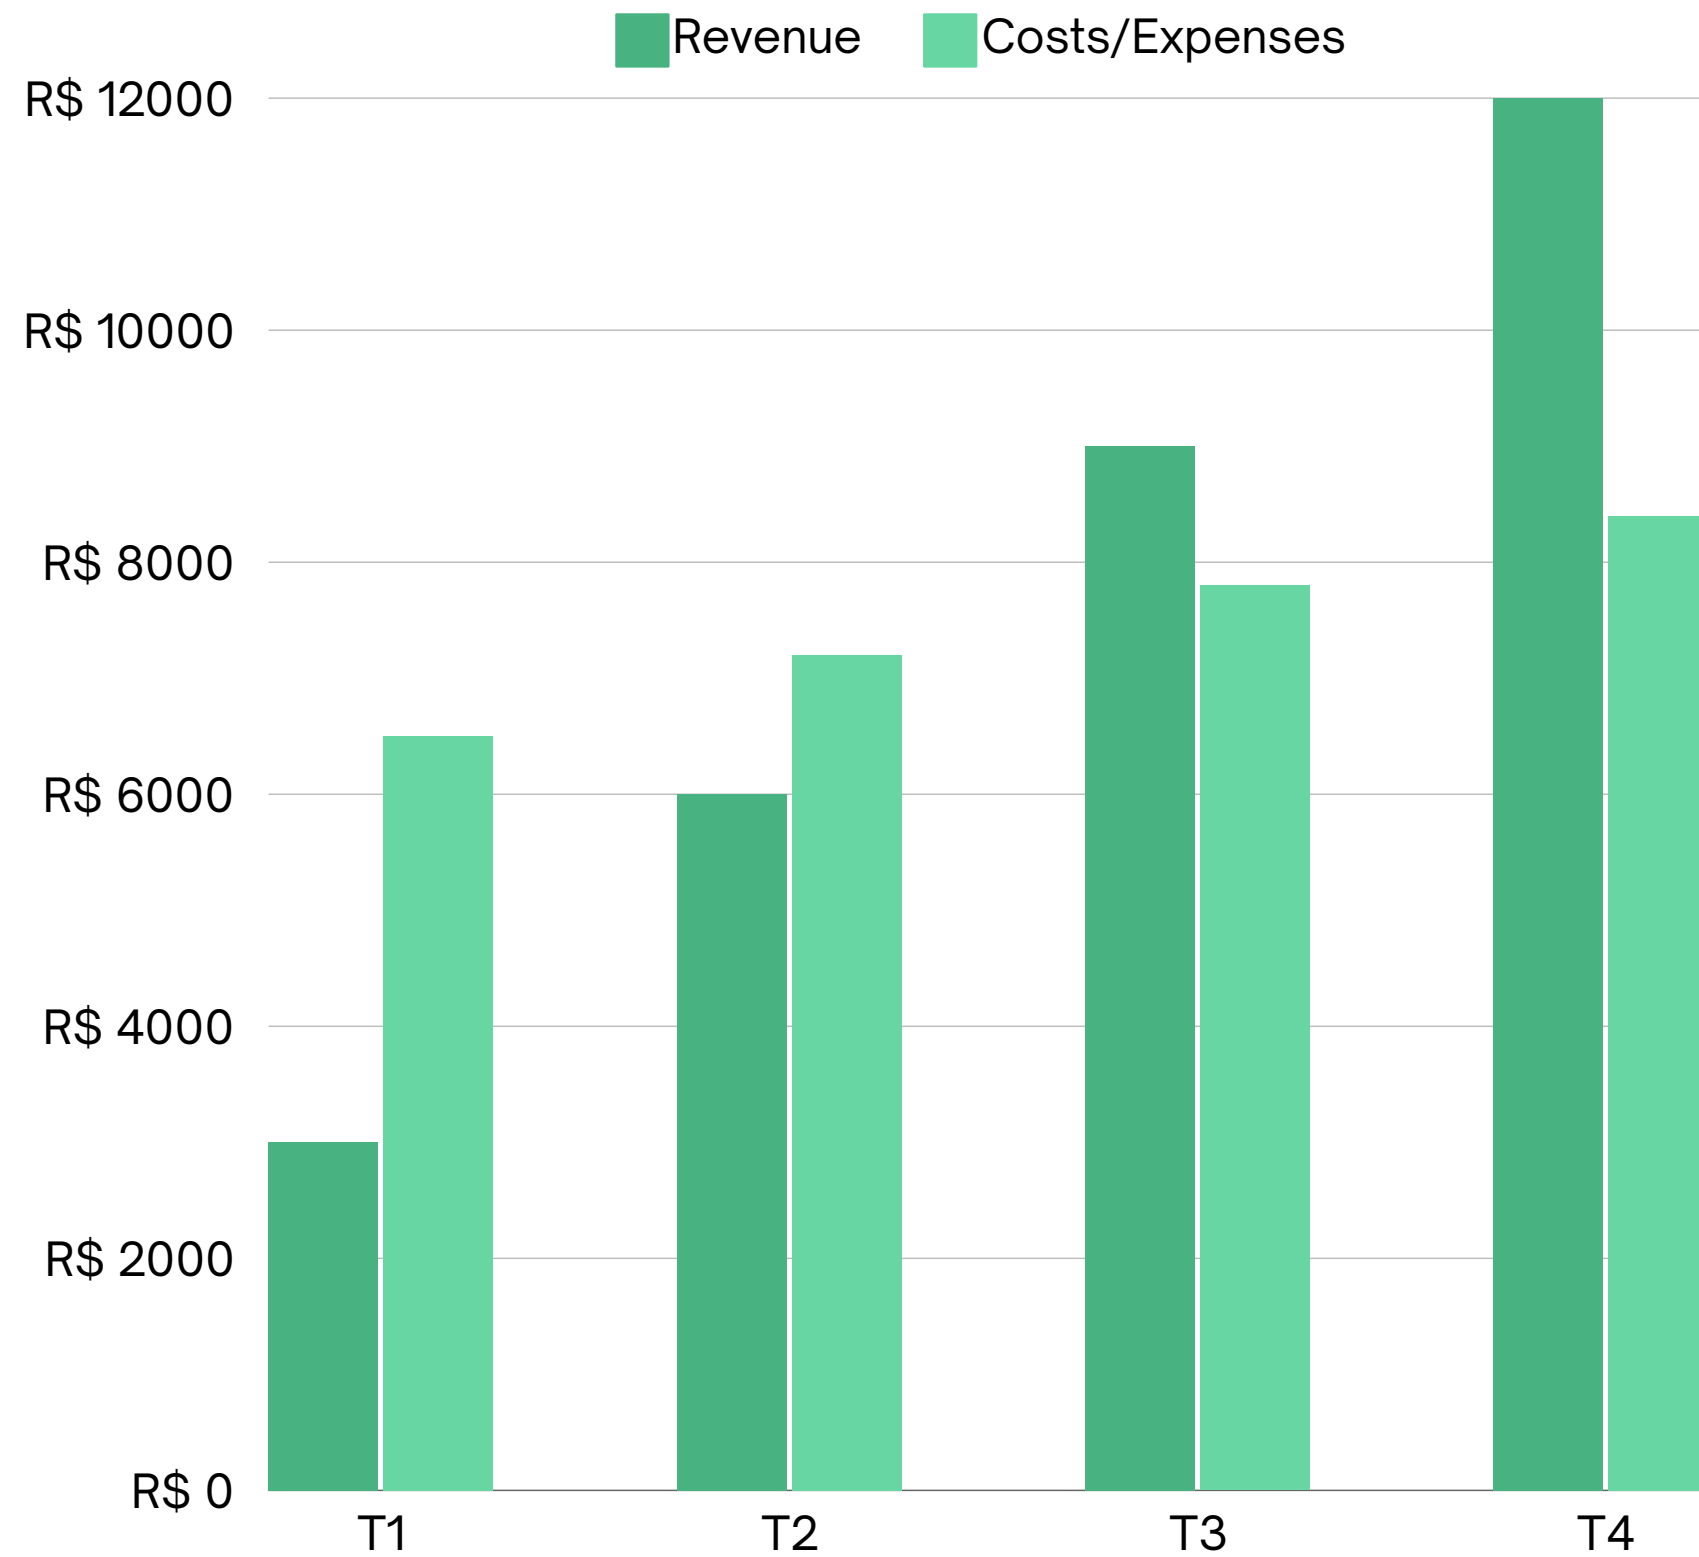

## **SCORING AND CERTIFICATION SYSTEM**

Through a scoring and certification system, professionals can demonstrate their skills in a quantifiable and recognized way, which increases their credibility in the market
