

Projeto Integrador

Anápolis, 09 de setembro de 2024.

Discente: Matheus Marques Portela, Marcos Paulo Moreira Damasceno, Pedro Henrique Matias, Victor Duarte Madaleno, Gustavo Vitor dos Reis

Nome da disciplina: Inglês instrumental para computação

PITCH - MasterSecurity

- Introduction:

Our platform is designed to bridge the gap between highly skilled cybersecurity professionals and companies that require expert assistance in identifying, addressing, and resolving vulnerabilities in their systems. By providing a unique ecosystem where professionals can register and participate in tailored challenges, we offer a hands-on opportunity for them to sharpen their skills, stay updated with the latest industry practices, and gain real-world experience.

As professionals complete these dynamic challenges, they accumulate points and earn valuable certifications that reflect their expertise and capabilities. These performance metrics are then made visible to companies, allowing them to evaluate and select the most qualified professionals based on their specific cybersecurity needs and the nature of the vulnerabilities they face.

For companies, our platform is an invaluable resource for finding verified and highly skilled talent, ensuring that their security challenges are addressed by the best in the field. For professionals, it's a powerful tool for career advancement, reputation building, and continuous learning, empowering them to grow in a rapidly evolving industry while showcasing their accomplishments to potential employers.
